

Elevator Drains

Global Drain Technologies provides durable drainage solutions engineered to meet the required 100 gpm flow rates for building codes, all while featuring a minimalist design that blends seamlessly with any aesthetic.

2000 T-SERIES
Elevator Threshold Drain (3' Lengths)

2000 L-SERIES
Elevator Lobby Drain (7'9" Lengths)

ADA/HEEL PROOF COMPLIANT

Featuring 5/16" wide slot opening, ensures wheels, canes, and walkers won't get caught.

IAPMO CERTIFIED

Meeting the highest standards for plumbing and mechanical safety.

BUILDING CODE COMPLIANT

Compliant with New York City, California, San Francisco, and 2018 international Building Codes.

MULTIPLE CONFIGURATIONS

Versatile solutions accommodating unique requirements to fit any project's specific needs.

FULLY STAINLESS STEEL

Made from high-quality stainless steel for superior durability and corrosion resistance.

ANTI-CASCADING

Ensuring smooth and efficient water flow without overflow or splashing.

100 gpm

High capacity flow rate, meets standards without compromising on design.

TAMPER PROOF REMOVABLE COVER

Secure access for maintenance and retrieval when necessary.

DESIGNED TO COMPLY WITH:

- New York City Building Code 3007.3
- 2013 California Building Code 403.6.1, 403.6.2, 3007.4, 3008.4
- San Francisco Fire Code, Section 511.1.4
- 2018 International Building Code 3007.3 and 3008.3
