

Grate Styles

Global Drain Technologies grates have been third party tested and approved for their respective flow rates to meet code requirements in various jurisdictions across North America.

Our 2000 T-Series threshold drain comes standard with our Bar grate. The Bar grate features a flow rate of 100 gpm, ADA compliant design and sturdy stainless steel construction.

All our grate styles are available powder coated in a range of colors.

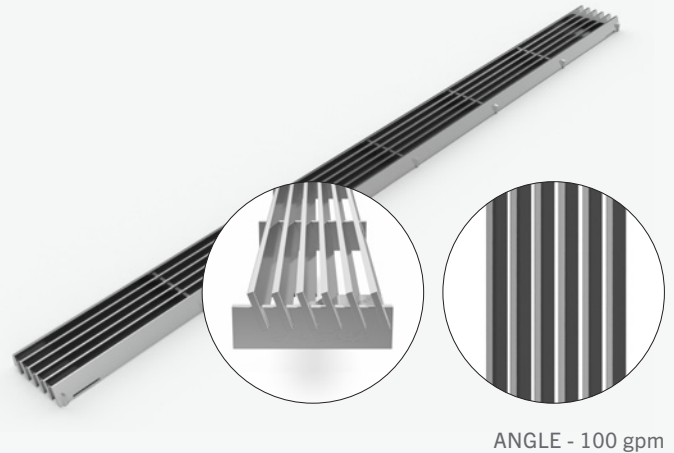

BAR - 100 gpm

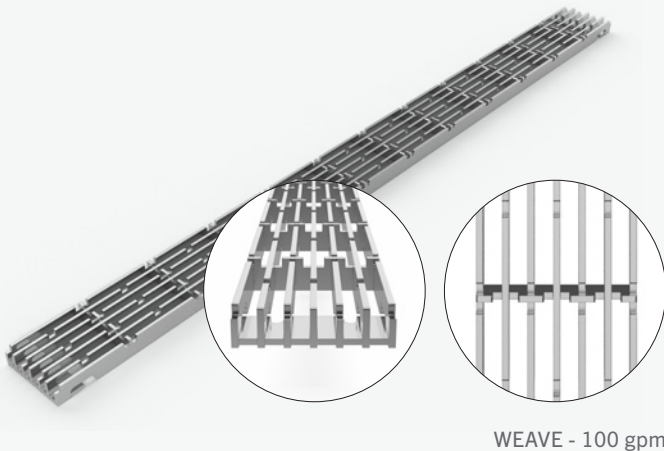

Product Design
Consultant

Gensler

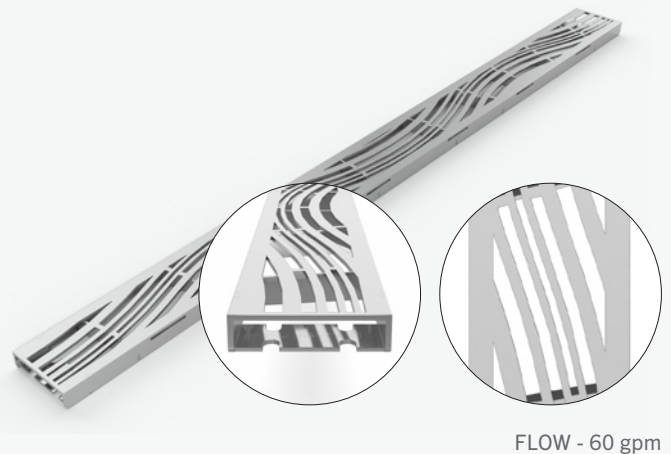

Global Drain Technologies has collaborated with Gensler serving as product design consultant for our elevator drains collection. This collection features third party tested load rated grates that were designed by architects and certified by engineers.

ANGLE - 100 gpm

WEAVE - 100 gpm

FLOW - 60 gpm
