

GENERAL:

The KeyForm-Trench aluminum system is designed to create grooved channels in the concrete parallel to the drain during the pour. This ensures the floor finished coating is at the accurate elevation and has optimum bonding with the drain. The system works seamlessly with all linear FoodSafe Trench Drains manufactured by FoodSafe Drains.

MATERIALS:

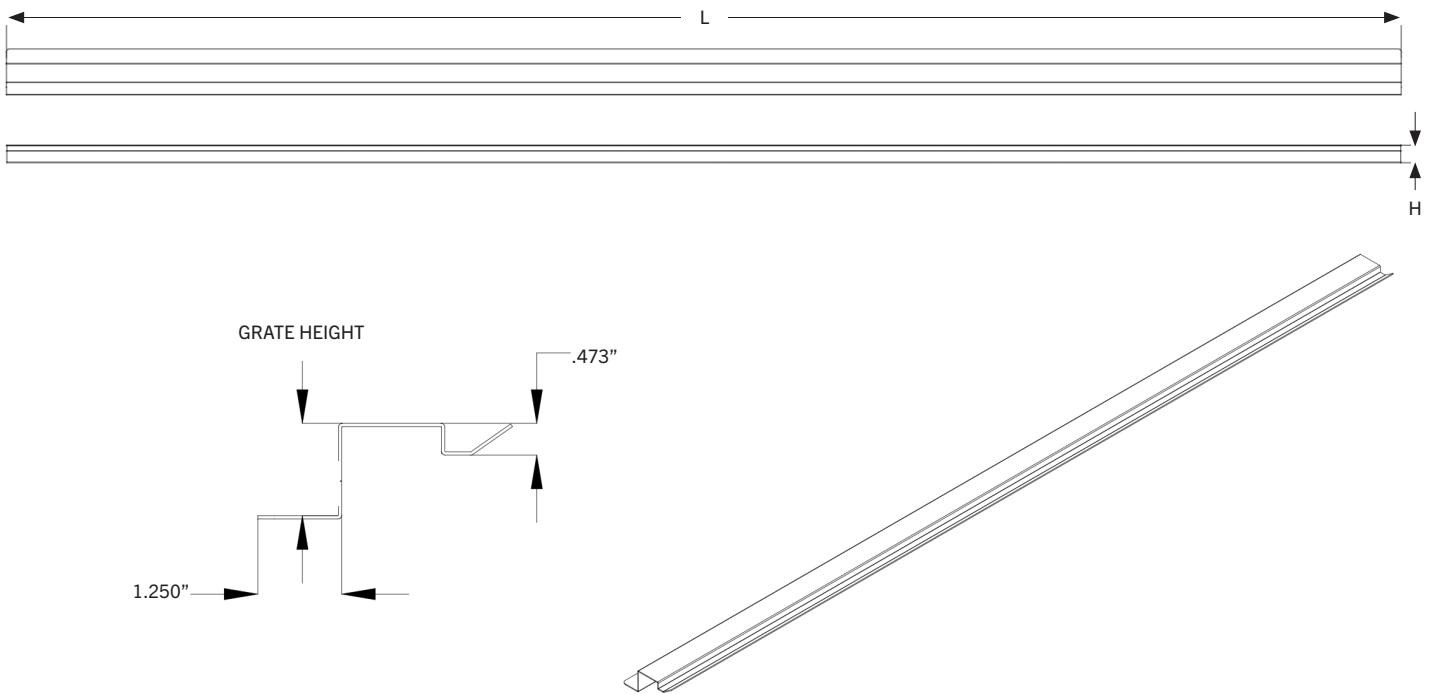

- Coated Aluminum

DESIGN OPTIONS:

- KeyForm is provided in standard Lengths only.
- Custom length can be modified on site by the installer.

INSTALLATION:

The KeyForm-Trench shall be installed in accordance with the manufacturers installation instructions and recommendations.
